

Customer Support Knowledge Base — Account & Authentication

Synthetic support articles covering account access, passwords, verification, security, profile settings, and login troubleshooting. Designed for RAG retrieval evaluation.

Article count: 38

KB-001 — Resetting a forgotten password

Common question: How do I reset a forgotten password?

Resolution: Use the password-reset option on the sign-in screen. Enter the email address associated with the account and follow the verification link.

Recommended steps:

1. Only request a new reset link after checking spam or promotions folders. Reset links expire, so use the newest message.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-002 — Reset link expired

Common question: My password reset link no longer works.

Resolution: Password reset links are time-limited for security. Request a fresh link and use it promptly.

Recommended steps:

1. Do not reuse an older link after requesting a new one.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-003 — Password requirements

Common question: What makes a password valid?

Resolution: Use a unique password that meets the minimum length and complexity rules shown on the password form. Avoid common passwords and information that can be guessed from your profile.

Recommended steps:

1. If the form rejects a password, follow the exact requirement message displayed beside the field.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-004 — Change password while signed in

Common question: How can I change my current password?

Resolution: Open account security settings and choose Change Password. Confirm the current password, then enter and save the new password.

Recommended steps:

1. Sign out and sign back in once the change is complete to verify the new credential.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-005 — Email address change

Common question: Can I change the email address on my account?

Resolution: Yes, when the account is eligible for an email change. Update the address in profile or security settings and complete verification sent to the new address.

Recommended steps:

1. Keep access to the current account until the new address is verified.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-006 — Email verification not received

Common question: I did not receive my verification email.

Resolution: Check spam, junk, promotions, and any corporate email quarantine. Confirm that the address is spelled correctly, then request another verification email.

Recommended steps:

1. Avoid repeatedly requesting messages in rapid succession because this can delay delivery.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-007 — Account locked after failed logins

Common question: Why is my account temporarily locked?

Resolution: Repeated unsuccessful sign-in attempts can trigger a temporary security lock. Wait for the lockout period to end or use the password-reset flow.

Recommended steps:

1. Do not keep guessing passwords during the lockout period.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-008 — Two-factor authentication setup

Common question: How do I enable two-factor authentication?

Resolution: Open Security settings, choose two-factor authentication, and follow the enrollment instructions for the supported authenticator method.

Recommended steps:

1. Save any recovery codes in a secure location that is separate from the device used for authentication.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-009 — Two-factor authentication code rejected

Common question: My authentication code is being rejected.

Resolution: Make sure the device clock is set automatically and that you are entering the current code from the correct account entry.

Recommended steps:

1. If multiple authenticator entries exist, confirm that you are using the one created for this service.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-010 — Lost authenticator device

Common question: I lost the phone used for two-factor authentication.

Resolution: Use a saved recovery code or another approved recovery method. If no recovery method is available, contact support for identity verification.

Recommended steps:

1. Support may require additional account-ownership checks before removing two-factor authentication.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-011 — Recovery code unavailable

Common question: I cannot find my recovery codes.

Resolution: Recovery codes are only shown during setup or regeneration. If you no longer have them, use another approved recovery method.

Recommended steps:

1. Do not share recovery codes with support agents or other people.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-012 — Suspicious login alert

Common question: I received an alert for a login I do not recognize.

Resolution: Treat an unfamiliar login as a security event. Change the password, review active sessions, and remove sessions you do not recognize.

Recommended steps:

1. If account takeover is suspected, contact support immediately after securing the account.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-013 — Sign out of all sessions

Common question: How do I sign out everywhere?

Resolution: Use the security settings option to revoke active sessions. This signs out devices and browsers that currently have an active session.

Recommended steps:

1. After revoking sessions, sign in again only on devices you trust.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-014 — Session expired unexpectedly

Common question: Why was I signed out automatically?

Resolution: Sessions can expire because of security policies, inactivity, password changes, or browser storage changes.

Recommended steps:

1. Sign in again and check whether the issue repeats across multiple browsers or devices.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-015 — Browser cache affecting login

Common question: Could browser data be causing sign-in problems?

Resolution: Old cookies or cached authentication data can interfere with sign-in. Clear site data for the service or try a private/incognito window.

Recommended steps:

1. If private browsing works, clear the normal browser's site data and retry.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-016 — Login works on one device only

Common question: Why can I log in on my phone but not my computer?

Resolution: The problem is likely device, browser, network, or stored-session specific rather than an account-wide failure.

Recommended steps:

1. Try another browser, disable conflicting extensions, and test the same network if possible.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-017 — Username or email not recognized

Common question: The sign-in form says my account does not exist.

Resolution: Verify that you are using the email address originally registered to the account. Check for spelling differences or an alternate address.

Recommended steps:

1. Do not create a duplicate account before support confirms the original account cannot be recovered.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-018 — Account deactivated

Common question: Why is my account showing as deactivated?

Resolution: A deactivated account may result from an administrative action, policy issue, or a user-requested closure. The sign-in screen may provide a recovery path.

Recommended steps:

1. Contact support if the deactivation was unexpected and be prepared to verify account ownership.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-019 — Deleting an account

Common question: How do I permanently delete my account?

Resolution: Use the account deletion option in account settings if available. Review the deletion warning because deletion can be irreversible.

Recommended steps:

1. Export any information you are entitled to retain before confirming deletion.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-020 — Reactivating an account

Common question: Can a deleted or deactivated account be restored?

Resolution: Some deactivated accounts can be reactivated within a defined recovery window; permanently deleted accounts may not be recoverable.

Recommended steps:

1. Contact support with the original account email if the self-service recovery option is unavailable.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-021 — Duplicate accounts

Common question: I accidentally created two accounts.

Resolution: Choose the account that contains the correct history or subscription and avoid using the duplicate. Account merging may require support review.

Recommended steps:

1. Do not delete either account until support confirms which data can be preserved.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-022 — Changing profile name

Common question: How do I update my profile name?

Resolution: Edit the profile information in account settings and save the change. Some verified or organization-managed fields may not be editable by the user.

Recommended steps:

1. If a field is locked, contact the account administrator or support team.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-023 — Changing phone number

Common question: How do I replace the phone number on my account?

Resolution: Update the phone number in security settings and complete any verification requested.

Recommended steps:

1. If the old number is required for verification and you no longer have access, use the account recovery process.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-024 — Phone verification failed

Common question: Why does phone verification fail?

Resolution: Check the number format, country code, carrier reception, and whether SMS messages are being filtered or blocked.

Recommended steps:

1. Wait before requesting repeated codes, then try voice verification if the account offers it.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-025 — Not receiving SMS codes

Common question: My verification SMS never arrives.

Resolution: Confirm that the phone can receive ordinary SMS messages and that short-code messages are not blocked by the carrier.

Recommended steps:

1. If ordinary SMS works but verification messages do not, contact support after checking carrier filtering.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-026 — Social sign-in

Common question: Can I sign in with a third-party identity provider?

Resolution: If a supported social or identity provider is shown on the login page, you can use it. The provider account must correspond to the service account.

Recommended steps:

1. Use the same provider consistently to avoid accidentally creating duplicate accounts.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-027 — Social sign-in creates a new account

Common question: Why did social login create a second account?

Resolution: The provider may have returned a different email address from the one used on the existing account.

Recommended steps:

1. Sign out of the new account and contact support if you need eligible accounts linked or consolidated.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-028 — Account ownership verification

Common question: What information may support request to verify ownership?

Resolution: Support may request non-sensitive account details and verification steps designed to confirm ownership.

Recommended steps:

1. Never send a password, one-time code, recovery code, or private authentication secret to support.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-029 — Security after device theft

Common question: What should I do if a device with an active session is stolen?

Resolution: Immediately revoke active sessions, change the password, and remove the stolen device from trusted-device lists if available.

Recommended steps:

1. If the device contained saved credentials, rotate those credentials as well.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-030 — Trusted device management

Common question: How do I remove a trusted device?

Resolution: Open security settings and remove the device from the trusted-device list. The device may then require additional verification at the next login.

Recommended steps:

1. Remove devices you no longer own or recognize.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-031 — Captcha or security challenge loop

Common question: Why am I stuck in a repeated security challenge?

Resolution: Security challenges can loop when cookies are blocked, browser extensions interfere, or the network changes rapidly.

Recommended steps:

1. Try a normal browser window, allow required cookies, disable conflicting extensions, and retry on a stable network.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-032 — Login blocked by corporate network

Common question: Why does login fail on my work network?

Resolution: Corporate proxies, firewalls, DNS filtering, or identity policies can block authentication traffic.

Recommended steps:

1. Test from a permitted network and ask the network administrator whether the service domains are being filtered.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-033 — Login from a new country

Common question: Why am I asked for extra verification while traveling?

Resolution: A new location or unusual sign-in pattern can trigger additional security checks.

Recommended steps:

1. Complete the verification if you initiated the login. Review security alerts afterward.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-034 — Account email domain changed

Common question: My company changed its email domain. What should I do?

Resolution: If the organization changed email domains, update the account address if self-service changes are allowed. Organization-managed accounts may require an administrator.

Recommended steps:

1. Do not create a new account solely because the company domain changed.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-035 — Privacy settings

Common question: Where can I manage account privacy settings?

Resolution: Open the privacy section of account settings to review available data-sharing, communication, and visibility controls.

Recommended steps:

1. Some controls may be restricted by organization policy or local requirements.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-036 — Marketing emails

Common question: How do I stop promotional emails?

Resolution: Use the unsubscribe link in a promotional message or change communication preferences in account settings.

Recommended steps:

1. Security and transactional messages may still be sent even when marketing messages are disabled.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-037 — Notification preferences

Common question: How do I control account notifications?

Resolution: Open notification settings and choose which product, security, and activity notifications you want to receive.

Recommended steps:

1. Keep security notifications enabled whenever possible.

Escalation: Escalate to support if the issue persists after the recommended steps.

KB-038 — Support cannot find account

Common question: Why can support not locate my account?

Resolution: The support team may be searching with a different email, organization account, or login method than the one you use.

Recommended steps:

1. Provide the exact sign-in email or approved account identifier, but never provide your password or one-time code.

Escalation: Escalate to support if the issue persists after the recommended steps.
